

The Meadley Buggy Box Technical Specification

Able Canopies are one of the leading manufacturers and installers of secure shelters and compounds in the UK. The Meadley Buggy Box is constructed from steel, covered with vandal and shatter resistant 4mm polycarbonate sheets and has a no crawl under perimeter for ultimate security.

Vandal & Shatter Resistant

The Meadley Buggy Box is constructed from 4mm polycarbonate panels. The panels are resistant to all mechanical stresses both accidental and intentional, even when particularly heavy. It is therefore particularly suitable for use in areas where vandalism is a potential problem.

Up to a 10 year guarantee

A standard powder coated shelter comes with a 5 year guarantee. The shelter can be galvanised (and powder coated if required) for ultimate corrosion protection and comes with a 10 year guarantee.

Maintenance FREE

The Buggy Box requires only periodic cleaning. To clean the polycarbonate we recommend a solution of warm water, a mild detergent and a soft brush.

Choice of colour

Panels are available in clear, opal & bronze. The frame is available in any of our standard RAL colours. Non-standard RAL colours are available at an additional cost.

The Meadley Buggy Box Technical Specification

Secure storage

To prevent the theft of buggies the shelters have secure lockable doors and are designed with a small gap between the floor and the frame doors.

Temperature Range

The polycarbonate's mechanical performance is known to remain stable in prolonged temperatures ranging from -50°C to $+90^{\circ}\text{C}$.

Weather resistance

During the manufacture of our polycarbonate sheeting a layer of UV absorber is co-extruded onto the surface forming a barrier against UV radiation.
