

Grasmere Shelter Technical Specification

Resistant to breakage

Our steel shelters are shatter and vandal resistant. The 4mm polycarbonate panels have high impact strength providing excellent resistance to breakage.

Up to a 10 year guarantee

The Grasmere shelter can be galvanised (and powder coated if required) for ultimate corrosion protection and comes with a full 10 year guarantee. Powder coated only shelters come with a 5 year guarantee.

Maintenance FREE

Our shelters require only periodic cleaning. To clean the polycarbonate we recommend a solution of warm water, a mild detergent and a soft brush.

Choice of colour

Panels are available in clear, opal & bronze. The frame is available in any of our standard RAL colours. Non-standard RAL colours are available at an additional cost.

Grasmere Shelter Technical Specification

Method of Fixing

The feet of the shelters are bolted to the floor. Adjustable feet are used to keep the shelter level.

Unique edge trim

Our shelters use a unique clamping system on the edge of the shelter which reduces the need to drill holes in the panels which makes them longer lasting and more weather proof.

Weather resistance

During the manufacture of our polycarbonate sheeting a layer of UV absorber is co-extruded onto the surface forming a barrier against UV radiation.

Excellent fire performance

Our structured polycarbonate sheets have been tested to European EN13501-1 and British BS476 part 7 standards.
