

The Redmere Free Standing Canopy Technical Specification

The Redmere provides an entirely new way to build a free standing canopy using a unique corner structure for ultimate strength and large self-supporting spans.

Resistant to Breakage

The Redmere benefits from 5mm solid polycarbonate panels which are used for ultimate impact resistance.

Full Guarantee

The Redmere carries a full 10 year insurance backed guarantee for complete peace of mind.

Maintenance FREE

The Redmere requires minimum maintenance. To clean the roof we recommend a solution of warm water and a non-abrasive cleaner.

Choice of Colour

Glazing panels are available in clear, opal & bronze. The frame is available in any of our standard RAL colours. Non-standard RAL colours are available at an additional cost.

The Redmere Free Standing Canopy Technical Specification

Vandal & Shatter Resistant

The Redmere's solid polycarbonate panels are resistant to all mechanical stresses both accidental and intentional, even when particularly heavy. It is therefore particularly suitable for use in areas where vandalism is a potential problem.

Canopy Fittings

The Redmere is fitted with guttering and down pipes and is fully installed by our own, in-house trained teams of fitters.

Weather resistance

During the manufacture of our polycarbonate panels a layer of UV absorber is co-extruded on both sides which forms a barrier giving high UV protection from the sun.

Temperature Range

The polycarbonate's mechanical performance is known to remain stable in prolonged temperatures ranging from -50°C to +90°C.

High pitch & low pitch

Fully variable roof pitch from lowest permitted pitch of 5 degrees with excellent water integrity.
