

The Rydal Shelter Technical Specification

Including cycle, waiting and buggy shelters

Able Canopies are one of the leading manufacturers and installers of secure shelters and compounds in the UK. Tubular in design, the Rydal shelter provides a space which can be used to securely store bikes, park buggies and for people to sit under.

Resistant to breakage

Our 5mm solid polycarbonate panels are resistant to all mechanical stresses both accidental and intentional, even when particularly heavy. The panels are therefore suitable for use in areas where vandalism is a potential problem.

Up to a 10 year guarantee

A standard powder coated shelter comes with a 5 year guarantee. The shelter can be galvanised (and powder coated if required) for ultimate corrosion protection and comes with a 10 year guarantee.

Weather resistance

During the manufacture of polycarbonate sheeting a layer of UV absorber is co-extruded onto the front and sides forming a strong barrier against UV radiation.

Choice of colour

Panels are available in clear, opal & bronze. The frame is available in any of our standard RAL colours. Non-standard RAL colours are available at an additional cost.

The Rydal Shelter Technical Specification

Maintenance FREE

Our shelters require only periodic cleaning. To clean the polycarbonate we recommend a solution of warm water and a non-abrasive cleaner.

Weather resistance

During the manufacture of our polycarbonate sheeting a layer of UV absorber is co-extruded onto the surface forming a barrier against UV radiation.

Temperature Range

The polycarbonate's mechanical performance is known to remain stable in prolonged temperatures ranging from -50°C to +90°C.

Method of fixing

The feet of the shelters are bolted to the floor.
