

Shade Sail Technical Specification

Able Shade Sails are a premium product designed specifically for commercial use to provide a long and extremely durable structure. The cloth of the shade sail is lock stitched using advanced technology giving the best sun cover and protection available on the market today.

Strong & Durable

Our polyethylene shade sails are lock stitched for extra strength and durability. They are made from the strongest 370gsm material available and are heat set for minimum lifetime shrinkage.

Full Guarantee

Our shade sails carry a full 10-year guarantee for complete peace of mind.

High Point & Hypar

Standard designs include high point and hypar. A high point has one corner of the shade sail at a higher point than the other corners. A hypar has two opposite corners of the shade sails at a high point and two opposite corners at a low point.

High UV protection

The shade sail material is UV stabilised offering the highest UV protection. They block up to 96% of the sun's harmful UV rays.

Shade Sail Technical Specification

Choice of Colour

Available in a range of 14 contemporary colours including our unique designer collection. Our complete collection is shown below.

Standard Collection
