

The Windermere Range Technical Specification

Including cycle shelters, cycle compounds, buggy shelters and waiting shelters

Able Canopies are one of the leading manufacturers and installers of secure shelters and compounds in the UK. Our Windermere range incorporates a unique clamping system on the edge of the shelter which reduces the need to drill holes in the panels therefore avoiding water leakage and bulging of the panels.

Vandal & Shatter Resistant

The Windermere 4mm solid polycarbonate panels are resistant to all mechanical stresses both accidental and intentional, even when particularly heavy. It is therefore particularly suitable for use in areas where vandalism is a potential problem.

Up to a 10 year guarantee

A standard powder coated shelter comes with a 5 year guarantee. The shelter can be galvanised (and powder coated if required) for ultimate corrosion protection and comes with a 10 year guarantee.

Maintenance FREE

Our shelters require only periodic cleaning. To clean the polycarbonate we recommend a solution of warm water, a mild detergent and a soft brush.

Choice of colour

Panels are available in clear, opal & bronze. The frame is available in any of our standard RAL colours. Non-standard RAL colours are available at an additional cost.

The Windermere Range Technical Specification

No crawl under perimeter

Our shelters are designed with security in mind. The small gap made between the floor and the frame prevents the theft of cycles in secure compounds.

Unique edge trim

Our shelters use a unique clamping system on the edge of the shelter which reduces the need to drill holes in the panels which makes them longer lasting and more weather proof.

Weather resistance

During the manufacture of our polycarbonate sheeting a layer of UV absorber is co-extruded onto the surface forming a barrier against UV radiation.

Temperature Range

The polycarbonate's mechanical performance is known to remain stable in prolonged temperatures ranging from -50°C to +90°C.
