

Witton Shelter Technical Specification

Including cycle shelters, waiting shelters and buggy shelters

Able Canopies are one of the leading manufacturers and installers of secure shelters and compounds in the UK. Witton shelters can be used to store bikes, park buggies and as a place where people can wait. Choose from the Witton wall mounted, double sided or compound.

Resistant to Breakage

The Witton benefits from 5mm solid polycarbonate panels which have ultimate impact resistance.

Full Guarantee

The shelter can be galvanised (and powder coated if required) for ultimate corrosion protection and comes with a full 10 year guarantee. Alternatively the shelter can be powder coated only for a 5 year guarantee.

Weather resistance

During the manufacture of polycarbonate sheeting a layer of UV absorber is co-extruded onto the front and sides forming a strong barrier against UV radiation.

Choice of colour

Panels are available in clear, opal & bronze. The frame is available in any of our standard RAL colours. Non-standard RAL colours are available at an additional cost.

Witton Shelter Technical Specification

Maintenance FREE

Our shelters require only periodic cleaning. To clean the polycarbonate we recommend a solution of warm water and a non-abrasive cleaner.

Excellent fire performance

Our structured polycarbonate sheets have been tested to most European standards & to BS476 Part 7 & BS476 Part 6 with a Class 1 fire rating. They are classed as self-extinguishing & do not emit toxic gasses unlike PVCu panels.

Unique edge trim

Our shelters use a unique clamping system which reduces the need to drill holes therefore avoiding water leakage and bulging of the panels which makes them longer lasting and more weather proof.

Method of fixing

The feet of the shelters are bolted to the floor. Adjustable feet are used to keep the shelter level.
