

WALL-MOUNTED PARKER

Setting angle 45° l/r. available.

Model Series 3400

Model 3490

Bicycles parked in a space-saving and safe manner.

- No risk of injury as the hoops are rounded on all sides.
- Very robust tubular steel construction with broad solid steel mounting plate.
- For simple bolting to wall.
- Corrosion-proof and long-lived thanks to hot galvanizing.
- Also suitable for mountain bikes. Hoop spacing for bicycles with tyre width of up to 55 mm.
- Recommended installation distance where several parkers are installed in line: 650 mm.
- Packaging recyclable.
