The Evershade Technical Specification

Size

3m - 6m (multiple squares can be added together)

Framework

Main Frame is made from 150mm x 150mm steel box section with a 10mm thick base plate

Eaves Beam is made from 150mm x 150mm steel box section and is connected to the posts with an internal fixing system

Frame Finish

The steel frame can be galvanised, powder coated or galvanised and powder coated in any standard RAL colours as shown below.

Other non-standard RAL colours are available upon request.

Please visit: <http://www.ablecanopies.co.uk/colours-finishes.html>

Roof Fabric

The weight of the fabric is 590 g/sqm which gives it ultimate tear and split resistance. The tensile fabric has a strength of 252/250 da N/5 cm. The fabric is supplied in white as standard however there are 39 additional colours which are available at an additional cost. Please see overleaf for the full colour chart.

Weather Resistance

The tensile fabric is UV stabilised offering the highest UV protection. It blocks up to 99% of the sun's harmful UV rays. The tensile structures are constructed from waterproof tensile fabric which will not absorb moisture and is designed to perform well in all normal weather conditions.
