Witton Wall Mounted Cycle Shelter Technical Specification

Weather Resistance

During the manufacture of our polycarbonate sheeting a layer of UV absorber is co-extruded onto the surface forming a barrier against UV radiation. Our shelters use a unique clamping system which reduces the need to drill holes in the panels which makes them longer lasting and more weather proof.

Excellent Fire Performance

The sheets remain stable at very high temperatures where other materials cannot be used. The sheets low expansion is extremely important for the correct sizing of the sheets.

Life Expectancy:

Our canopies offer a life expectancy of up to 25 years; subject to the chosen finish and adherence to the maintenance schedule.

Maintenance:

Please follow our maintenance schedule, which is found in your After Sales pack.

CAD Drawings are available on request
