The Ainsley Free Standing Canopy Technical Specification

Size

Length: 3m (can be extended in sections of 1.5m)

Depth: 2.08m

Height: 2.3m

The Ainsley can be installed back to back to create a dual-pitch structure.

Framework

The Main Frame is constructed from galvanised and powder coated steel.

Roof & Side Panels

Roof and Side Panels are available in 5mm solid polycarbonate, 16mm structured polycarbonate or 8mm toughened glass that is secured in place with glass locks. The roof panels are also available as steel corrugated sheets as an alternative to glass.

Colour

The frame can be finished in any RAL colour except pearl or signal colours.

Guttering

Integrated guttering is hidden within the canopy frame and posts. Water is dispersed along the inside of the posts and out through water spouts.

Weather Resistance

The steel frame is galvanised as standard for ultimate corrosion protection and weather resistance.

Maintenance:

Minimal maintenance is required, please follow our maintenance schedule, which is found in your After Sales Pack.
